CLAIMS
What is claimed is:

1. A coating film transfer tool comprising:

a supply reel having a transfer tape wound thereon, the transfer tape comprising a base tape coated with a coating film;

a transfer head for pressing the transfer tape against a receiving surface to transfer the coating film thereto;

a take-up reel for taking up used base tape; and

a belt-type driving mechanism, said driving mechanism comprising an endless belt cooperatively connecting the supply reel with the take-up reel;

wherein the base tape extends from the supply reel, and past the transfer head to the take-up reel; and

wherein a belt guide for guiding said belt is disposed between the supply reel and the take-up reel.

2. The coating film transfer tool according to claim 1, wherein the guide member is a roller.
